

Anthony Ege Kopri

Senior Unity and C# Developer | Software Engineering, Tools, Pipelines and Automation

Berlin, Germany | +49 176 4578 2871 | anthonyegekopri@gmail.com

LinkedIn: linkedin.com/in/anthony-kpr | Portfolio: anthonykopri.github.io/portfolio

Languages: Turkish (Native), English (Bilingual), German (A1 - learning)

SUMMARY

Senior Unity and C# developer with 5+ years of experience shipping mobile games and accelerating iteration through Unity Editor tooling, workflow automation, reusable frameworks, and custom plugins. Strong in rapid prototyping, refactoring, and maintaining production codebases for stability and performance. Currently also working part-time on React + Vite frontend modernization, form-pipeline automation, backend improvements, and AI-assisted development workflows.

SHIPPED TITLES

Cashier 3D - Arrow Fest - Bus Jam - Tangled Snakes

SKILLS

- **Game Development:** Unity, C#, Unity Editor tooling, custom plugins, custom tool development, workflow automation, rapid prototyping, gameplay systems, mobile games, WebGL
- **Engineering:** codebase maintenance and refactoring, performance and stability optimization, reusable frameworks/libraries, content and configuration pipelines
- **Architecture and Tools:** Zenject, UniRx, MVP, Git, CI/build automation, Android and iOS development workflow
- **Project Exposure:** Unity Multiplayer, Mirror (Unity), Photon (Unity), Web3 development
- **Web, CRM and AI:** React, Vite, JavaScript, HTML, CSS, Salesforce, AI assisted development tools, LLM assisted coding workflows
- **Additional Languages and Databases:** Java, Python, SQL, C

EXPERIENCE

Familiara GmbH - Frontend & Automation Developer (Part-time) | Berlin, Germany | May 2026 - Present

- Modernizing the company website by transferring the frontend from WordPress to React + Vite.
- Preparing an automated form pipeline to merge multiple form flows and support backend system updates.
- Assisting with an unannounced AI project and using AI-assisted development tools to speed up implementation and iteration.

Rocket Tuna Games - Co-Founder & Senior Unity Developer | Romania | Apr 2025 - Sep 2025

- Built Unity Editor tools and internal plugins to streamline level design, UI workflows, and fast iteration in small teams.
- Created reusable templates/libraries and automated repetitive tasks to accelerate prototyping and standardize implementation.

NanoTribe GmbH - Unity Developer | Berlin, Germany | Feb 2021 - Mar 2025

- Prototyped and iterated on mobile games; translated concepts into playable builds and production-ready systems.
- Implemented core gameplay systems; improved codebases for stability, performance, and maintainability.
- Built internal Unity Editor tools and automation pipelines to reduce designer friction and speed up delivery.

ValhallaVerse - Freelance Game Developer | Remote | Dec 2021 - Nov 2022

- Worked on Unity game development tasks involving WebGL, multiplayer gameplay, and Web3-oriented project requirements.
- Gained project exposure to Unity Multiplayer, Mirror, and Photon while supporting gameplay prototypes and iteration.
- Built and adjusted custom Unity tools/workflows to support faster development and testing.

Besh Bilisim Donanim ve Internet Hizmetleri - Junior Full-Stack Programmer | Izmir, Turkey | Aug 2019 - Aug 2020

- Delivered a hardware-related prototype as the sole developer; built an internal proprietary file explorer/reader/editor tool.

EDUCATION

Dokuz Eylul University - BSc, Computer Science | Jun 2018 - Jun 2022 | GPA: 3.33/4.00

Capstone: Synesthesia (GAN)
