

ANTHONY EGE KOPRI

Software Engineer | Unity, C#, Mobile Games, Tools & Workflow Automation

Berlin, Germany | +49 176 4578 2871 | anthonyegekopri@gmail.com | linkedin.com/in/anthony-kpr | anthonykopri.github.io/portfolio

SUMMARY

Software Engineer and Unity Game Developer with 5+ years of experience shipping and maintaining global mobile games, internal tools, and production workflows. Strong in Unity, C#, gameplay systems, mobile optimization, production debugging, Unity Editor tooling, live game support, API integration, and practical application development.

SELECTED SHIPPED MOBILE TITLES

Cashier 3D | Arrow Fest | Bus Jam | Tangled Snakes

CORE SKILLS

Languages: C#, Java, Python, SQL, C, JavaScript, HTML/CSS

Unity & Game Development: Unity, Unity3D, gameplay programming, mobile games, WebGL, Android/iOS workflows, rapid prototyping, live game support

Mobile Production & Analytics: performance analysis, mobile optimization, production debugging, stability improvement, live operations, AdMob, Unity Ads, GameAnalytics, Adjust, Facebook SDK, Firebase Analytics

Architecture & Tools: Unity Editor tooling, custom plugins, reusable systems, MVP architecture, dependency injection, Zenject, UniRx, Mirror, Photon

Workflow & Quality: Git, GitHub, GitHub Actions, API integration, Play Console, TestFlight, automated testing, integration testing, Salesforce CRM exposure, AI-assisted development workflows

Collaboration: agile development, cross-functional collaboration, product/design/art collaboration, designer-facing workflows, technical documentation

PROFESSIONAL EXPERIENCE

Familara GmbH - Software & Automation Developer (Part-time), Berlin, Germany | May 2026 - Present

- Support frontend implementation and internal software automation for a care-support company, including UI updates, form handling, API integration, and process improvements.
- Use JavaScript, HTML/CSS, Git/GitHub, GitHub Actions, Salesforce CRM exposure, and AI-assisted development workflows to deliver lightweight internal tools and website improvements.

Rocket Tuna Games - Co-Founder & Senior Unity Developer, Romania / Remote | Apr 2025 - Sep 2025

- Co-founded a small game development team and led Unity/C# development across early-stage concepts, gameplay prototypes, and internal production workflows.
- Built Unity Editor tools, custom plugins, reusable templates, libraries, and automation workflows to streamline level design, UI workflows, and rapid iteration.

NanoTribe GmbH - Unity Developer, Berlin, Germany | Feb 2021 - Mar 2025

- Shipped and maintained global mobile titles including Cashier 3D, Arrow Fest, Bus Jam, and Tangled Snakes.
- Implemented gameplay systems and production features in Unity/C# from prototype stage through live release and post-launch support.
- Optimized and refactored production codebases to improve stability, maintainability, loading behavior, and mobile runtime performance.
- Supported mobile production workflows involving analytics, ads, SDKs, testing, release preparation, and live operations.
- Built Unity Editor tooling, reusable systems, content/configuration pipelines, and designer-facing workflows for faster iteration.
- Collaborated with product, design, and art teams to convert concepts into playable, testable, production-ready mobile builds.

ValhallaVerse - Freelance Game Developer, Remote | Dec 2021 - Nov 2022

- Worked on Unity development tasks involving WebGL, multiplayer gameplay, and Web3-oriented prototype requirements.
- Gained exposure to Unity Multiplayer, Mirror, and Photon while supporting gameplay prototypes, testing, and iteration.

Besh Bilisim Donanim ve Internet Hizmetleri - Junior Full-Stack Programmer, Izmir, Turkey | Aug 2019 - Aug 2020

- Delivered a hardware-related prototype as the sole developer and built an internal proprietary file explorer, reader, and editor tool.

EDUCATION

Dokuz Eylul University - BSc, Computer Science | Jun 2018 - Jun 2022 | GPA: 3.33/4.00 | Capstone: Synesthesia (GAN)

LANGUAGES

Turkish (Native) | English (Bilingual) | German (A2 - learning)
